

Uni- Gloss High Gloss Sealer

General Description

Uni-Gloss is a clear, high gloss, non-yellowing concrete and masonry surface sealer specially formulated of acrylic polymers in a solvent solution. This coating is outstanding in its ability to protect surfaces from staining and discoloration.

Uses

Exterior - very effective on exposed aggregate, stamped concrete or concrete pavers to achieve the "wet look" and to minimize discoloration caused by the rough texture trapping dirt particles. Excellent all round weather proofing coating. Effective sealer for terrazzo, stone, slate and unglazed tiles.

Interior - floor sealer and dust proofer. Protective coating for concrete and other substrates against occasional spills of acids, alkalis, food acids, oil, waterbased paints, wet concrete, etc.

Physical Properties

Appearance	- Clear liquid	
Density (25°C)	- 0.94 kg/litre (7.8lb/gallon)	
Dry Film Appearance	- Clear	
Coverage	- 1 st coat, 30 - 50 ft ² per litre (150 to 200ft ² /gallon)	- 2 nd coat, 60 - 100ft ² /litre (300 to 400ft ² /gallon)
Solids	- 25%	

Application Instructions

Make sure surface is free of oil and dirt. This can be achieved by scrubbing with a soap solution of tri sodium phosphate (TSP). After cleaning, rinse the surface thoroughly and let dry. Apply Uni-Gloss by spray, brush or roller. Clean up tools with Xylene.

Packaging

Available in 3.78 litre (1 US gallon), 18.93 litre (5 US gallon), and 205 litre (55 gallon) container.
